VOL. 6 NO. 45 | Lancaster Farming, Saturday, September 30, 1961 | $2 Per Year

LANCASTER COUNTY'S 4-H dairy judging team which won first place over 37 other county teams at the annual State 4-H Days, on the Penn State campus, Aug. 14-16, is shown above, from left: Victor Plastow, associate Lancaster county agent coach; Robert Wenger, Route 1, Quarryville; Paul Trimble, Route 1, Quarryville; Paul Welk, Route 1, Strasburg, and Donald Trimble, Quarryville Route 1. The team won the right to represent the state at the national dairy judging contests held in conjunction with the National Dairy Congress in Waterloo, Iowa. The team and Mr. Plastow left Lancaster County last Wednesday and compete on Monday,. October 2, in Iowa.

Lampeter Fair Dairy Show Features Senior Champs

The Holstein herd of Robert Kauffman, Manheim R1, almost dominated the black and white division of the Lampeter Fair Dairy judging Thursday afternoon; Marilyn Harnish, Quarryville R2, returned to her winning ways with her Ayrshire cow, and Rohrer Witmer, Willow Street R2, showed both senior and Grand champions in the Guernsey Breed. Phyllis Landis, 172 Oakview Rd., having no competition in the Jersey classes won all ribbons in that division.

In the large Holstein classes, Glenn Musser, Mount Joy R1, showed his Junior yearling to the junior championship, but Kauffman's aged cow was followed from senior champ to grand champion by the reserve champion aged cow of Robert Hess, Strasburg R1. Judge Jonas Gruver, Holstein breeder of York County, stayed with the aged cows for his grand and reserve champions of the show.

Aged cows collected both the top spots in Guernsey competition. as the Witmer entry was followed in the final placing by the aged cow of Herbert Myer, Lancaster R7. The Junior champion was exhibited by Marlin Schnupp, Gypsy Hill Rd.

Again in the Ayrshire placings, the aged cows were placed over the junior champion in the final accounting. The runner up for senior champion, shown by Marvin Miller, Strasburg R1, went on to collect the reserve breed championship. The junior champion was the senior calf of R. Edwin Harnish, of Christiana R1.

Ayrshires, Guernseys and Jerseys were judged by Harry Mumma, a Guernsey breeder from Manheim R1.

In the youth showmanship contest, John Welk, Strasburg R1 took top honors while Harold Welk of the same address did the same in the fitting contest.

Following is a list of the placings in the judging.

HOLSTEIN

Junior Calf — 1, Richard Hess, Strasburg R1; 2, Harold Welk, Strasburg R1; 3 J. Mowery Frey Jr., Lancaster R7, 4, Harold Ranck Jr. Lancaster R7; 5, Donald Musser, Mount Joy R1; 6, Melvin Peifer, Wilow Street R2

Senior Calf — 1, J Mowery Frey Jr; 2, Robt Kauffman, Manheim R1; 3, Linda Welk, Strasburg R1; 4, Glenn Musser, Mount Joy R1; 5. Larry McComsey, Christiana R1, 6, Richard Hess, Strasburg R1

Junior Yearling — 1, Glenn Musser, 2, Melvin Peifer; 3, Clarence Bauman, of Lancaster R7, 4, Robt Kauffman, 5, Harold Brubaker, of Mount Joy R1; 6, Paul Welk.

Senior Yearling — 1, Melvin Beiler. Gordonville R1; 2, J Mowery Frey Jr; 3, Melvin Peifer; 4, Robt Kauffman; 5, Robert Hess; 6, Jas. High, Lancaster R7.

Junior Champion — Glenn Musser (Junior Yearling)

Ephrata Beef To Two Girls And Two Angus

Two girls and two angus steers walked out of the ring with both the rosettes at the Ephrata Fair beef show Thursday night.

Nancy Louise Rohrer, the daughter of Mr. and Mrs. Melvin G. Rohrer, Lititz R3 showed her Chester-County-Bred angus to the grand championship of the show The 1,000 pound steer was bred by Morris Hitt of Landenburg.

Reserve champion honors went to the club project of Irene Bollinger, daughter of Mr and Mrs. Paul Bollinger of Denver R2. Her steer was bred by Millarden Farms of Annville.

The fathers of both girls were former members of Lancaster County 4-H clubs.

Judge Harold Stewart, Dauphin County agent, named John Zimmerman, Reinholds R1, champion showman Janice Showalter of Ephrata was champion fitter

Following are the placings in the show:

ANGUS

1 Nancy Louise Rohrer;

Mount Joy Lad Wins Lampeter Beef Show

Lee Stauffer, a 14 year-old sophomore Future Farmer from Donegal High School nudged his 1,000 pound Hereford to the top of the beef show at Lampeter, Wednesday.

Reserve champion rosette went to the angus shown by Elvin Hess, Bareville R1.

Stauffer, the son of Mr. and Mrs. Wayne Stauffer, of Mount Joy R1, garnered the purple ribbon in his first outing in beef competition. His steer, Buster, purchased from Fenwick Farms in Maryland, went on feed last November 14 on the farm where the Stauffers annually feed out about 60 head of western-bred steers.

Five other Future Farmers of America from the Donegal High School made the treck to Lampeter this week. Moving into a show normally dominated by 4-H club steers, the FFA boys carried off a good portion of the top Hereford ribbons. The top Angus steers were 4-H club projects.

In the showmanship contest, Kenneth Hess of Strasburg caught Judge Tony Dobroski's eye and took the championship while Mary Jane Herr of Refton was runner up.

(Turn to page 6)

GRAND CHAMPION HEREFORD STEER in the Lampeter Fair was this 1,000 pound blocky fellow exhibited by his owner, Lee Stauffer of Mount Joy R1. Lee put his steer on feed last November after purchasing him from a Maryland breeding farm. Although "Buster" was the first show steer Lee ever exhibited, he is no novice at the feeding of cattle He helps his father, Wayne Stauffer, feed out about 60 Herefords each year —L F Photo

Feed Millers Elect Graybill

Robert B Graybill, Valley Road, Lancaster, was elected president of the Pennsylvania Millers and Feed Dealers Association at the annual meeting in the Hotel Hershey on Friday morning.

Graybill, vice president and general manager of Miller and Bushong, Inc. of Rohrerstown, will assume the duties of his office on January 1, 1962. He served the organization as first vice president during the past year.

Wilbur Hiestand of H. S. Siestand and Co, Inc of Salunga, and Paul Grubb of Grubb Supply Company, of Elizabethtown will continue as directors of the organization for another year.

Many feed dealers and millers from Lancaster County were on hand to witness the election of the new president.

FIVE - DAY WEATHER FORECAST

Saturday - Wednesday

Near normal temperatures are expected during the next five days except slightly cooler Monday and Wednesday. Normal temperatures for the week range from 51 at night to 72 in the afternoon. Precipitation may total 0.1 to 0.5 inch falling mainly as showers Sunday night and again late in the period.

The month ending today was the third driest September on record with only .29 inch recorded at Lancaster. September '43 had .18 inch and September 1891 had .28 inch of rainfall.

FARM CALENDAR

Oct 2 - 4:30 p m —Meeting of the Lancaster County Teachers of Vocational Agriculture in the Pequea Valley High School

Oct 2 - FFA and 4-H Dairy cattle judging contests at Waterloo, Iowa.

"Truly, a nation that can afford to complain about abundance — must be rich indeed." Secretary of Agriculture, Freeman.

New Holland

25 To Spots 50 Higher

Slaughter steers were fully 25 to spots 50 higher at the September 28 auction at New Holland. Cows were 50 to 1 00 lower. Bulls sold steady. Receipts included 1,-024 cattle.

High choice and prime 950 to 1,250 lb. slaughter steers brought 25 75 to 26.-50. Choice at 950 to 1,350 lbs. made 25 25-25.60. Good to low choice sold for 22.50 24.25. Standard were 21.25-22 50, and utility brought 15.50-16.50.

Canners and low cutters crossed the block at 14-14.50 while shelly canners sold down to 12 50.

Utility and commercial bulls made 19 50-22 50.

A few lots of good grade 550 to 756 pound stock steers went to the farms at 22 25 to 23.85 while a few lots of good grade feeder steers at 914 to 1,090 lb. returned to the feedlots at 22. 60 to 23.35.

CALVES· 422. Vealers sold 1 to 2 higher as good and choice made 28-34 and choice and prime brought 34-38. Standard and low good brought 24-28, and utility were 20-24. A few at 75 to 100 lb. sold for 18-22.

Prices continued about steady at the September 27 sale of dairy cattle. Receipts included 134 cows, five stock bulls and 29 stock heifers.

Fresh Holstein cows made $300-425, Guernseys brought $175-220 and other breeds sold for $175-250. Stock bulls were $100-185, and stock heifers made $80-135

The market continued about steady on the 228 head of horses, ponies and mules at the September 25 auction

Mare ponies brought $75-140 while geldings made $40 to 110. Riding horses were $110-195 and driving horses crossed the block at $110-200. Killers were 7 to 8 cents.

Wildlife Club Sees Gun Safety Demonstration

A demonstration on gun handling safety was the featured item on the program at the recent meeting of the Lititz 4-H Wildlife club, held at the home of the president, Jay Foreman, Lititz R1.

Melvin Long, Lititz R3, showed slides and presented a recording of birdsongs.

Members responded to a roll call by describing the wildlife they had seen during the past month.

Linda Mae Stauffer, Lititz R3 is reporter for the club.

Delmarva - Georgia

Sellers Resist Lower Prices

Live broiler prices averaged aproximately 3/4 cent lower during the 24 hour period ending 10:30 Friday morning as 678,500 head at farms brought prices of 11.9 to 14.1.

Strong seller resistance was noted as levels decreased, but offerings were more than ample for the current slaughter needs.

Estimated slaughter for the week end was 694,000 head compared to the 752,000 head last week end.

The Delmarva broiler-feed ratio for the week ending September 22 was up 2 points at 3 0 when broilers brought 13.68 and mash cost the grower $92 20 per ton.

"Our farmers deserve praise, not condemnation; and their efficiency should be a cause for gratitude, not something for which they're penalized."

Wheat Surplus? A Strange Paradox

A strange paradox in our national agricultural picture today shows a group known as the National Soft Wheat Committee urging full allotment planting of wheat this fall—despite a wheat surplus of over a billion bushels and a new federal program designed to reduce wheat production.

The committee, made up of producers and processors in the eastern half of the United States, has reported it does not feel that it is running headlong into the government's program. The committee emphasizes that the soft wheat farmer is not contributing to the wheat surplus. It maintains that across-the-board participation in the government's acreage diversion program could result in a soft wheat crop that would not meet domestic demands.

The program to which the committee refers includes a mandatory cut in wheat planting plus alternatives which will pay the farmer for diverting as much as 30 per cent more of his acreage into conservation uses.

The committee maintains that the vast surplusses of wheat are of the hard variety while supplies of soft wheat is in line with demand and may actually fall below current needs if farmers in the eastern part of the nation curtail production as much as is asked by governmental agencies.

In general terms wheat can be classified as "hard" or "soft" with the soft wheats including Eastern soft white winter and soft red, with the latter being generally grown in Pennsylvania and surrounding states. Hard wheat is grown primarily west of the Mississipi River.

At present rate of yearly carryover of soft wheat, supplies would last the housewife and the commercial baking industry less than a month, and because of the characteristics of wheat, the surplus of hard wheat can not be diverted into products now being *made from soft wheat flours — goods* such as cakes, crackers, cookies, wafers, pretzels and cereals.

The problem for eastern wheat growers then becomes one of economy. With the milling and baking industry requiring steady supplies of soft wheats and the government programs paying him for reducing production, can he make more money planting up to the legal limit or participating in the acreage diversion program?

The horns of the delimma are sharpened by the fact that government wheat programs do not differentiate sufficiently between classes of wheat. All grades and classes come under the same price support program.

A survey by the National Soft Wheat Committee seems to indicate the grower who is producing a crop with average yield per acre will be ahead of the game financially by passing up the government subsidy.

In addition, the committee points out, there is a good possibility that soft wheat prices will be higher next year, influenced by the increased government support level and at least some acreage reductions.

Further, the grower should realize that if Pennsylvania should lose her profitable and immediate market because of a shortage, she might never recover it in the future.

Pennsylvania growers, who harvested 15,466,000 bushels of soft red and 158,000 bushels of Eastern soft white wheat in 1961, would do well to consider the possible consequences of a drastic cutback in wheat acreage this fall.

At least that's how it looks from where we stand.

"If hog producers follow through on their reported breeding intentions, 1,845,000 sows will farrow during the '62 winter quarter from December thru February in the 10 corn belt states. This compares with 1,768,000 sows farrowed during the same period a year earlier, an increase of four per cent." so goes a report from the US Department of Agriculture.

A four per cent increase appears small, but some college professor has figured out that the total national surplus of fluid milk, at the rate of four swallows per half pint, could be consumed if every man, woman and child in the country took one more swallow every other day.

Hog prices in recent months have maintained one of the most stable planes in the farm commodity field. One more pork chop per family could throw the whole picture out of focus unless the market is prepared for it by cultivating a desire for that extra pork chop.

Many wise men have said in many different ways that there are at least four things by which men must live in the world. They were speaking, of course, of spiritual values, not of material necessities. Food, shelter, clothing, and the like man must also have. But if he has nothing more than these, life will be barren indeed. The other things that he must have are love, work, play, and worship. There can be no lasting happiness without love, there can be no satisfaction of achievement without work; there can be no release from tension without play; and there can be no experience of the joy and peace and power of life without worship. —Hoards Dairyman

How Jesus Grew

Lesson for October 1, 1961

A PERSON who no longer grows ceases to be a person. He becomes a fossil, if he is old, or he stays a baby, if he is young. Our world is cluttered up with babies who never grow up, and with fossils in human shape. The fossils haven't had a new idea in thirty years, and the babies haven't had any ideas of their own yet. A genuine human being grows throughout his life-time, grows in spirit when he no longer grows in his body.

Dr. Foreman

It shocks some people to think that Jesus ever grew; but Luke says plainly that he did, and tells us how. The church has always said that Jesus Christ is both God and man; and this is hard to understand But if we try to make the problem easier by saying that Jesus was a special kind of human being who did not grow and did not need to, then we are not making the problem easier but harder; for we are then denying that he was truly human.

He cut his way forward

Luke, writing our third Gospel, uses his Greek language with care He uses one word for "grow" —in Luke 2:40, and another word in Luke 2:52. Luke 2:40 tells how Jesus grew, or rather simply tells us that Jesus did grow, **before** he was twelve years old. Luke 2:52 tells us how Jesus grew **after** he was twelve years old. In speaking of the little boy Jesus, Luke says he grew, but he uses the same word that is used to describe the growth of garden plants and flowers It is a good word to tell how little children grow It comes naturally, they can't help growing! Give them food and sleep and the out-of-doors to play in, and they will grow without knowing it.

But after twelve Luke has another word. It is a word suggesting effort, struggle.

Body and mind

Some people are, we say, one-sided. Part of them grew but the rest didn't. We have all known people who were "brains" but physical weaklings. We have also seen people who are very strong up to the neck, but pretty weak above that spot. Luke is careful to tell us that Jesus grew both in wisdom and in stature; that is to say, mentally and physically. The old Greeks used to have a motto which the Romans copied and is still in circulation: "A sound mind in a sound body." Jesus cut his way forward in both respects He grew in wisdom—that word is important also. No doubt he grew in knowledge. His mother would teach him, as Deuteronomy directs parents to do; but while knowledge can be put into a boy or girl from the outside, as it were, by an instructor, wisdom—that is, knowing what to do with the knowledge you have—has to be developed on the inside A coach can guarantee to teach a boy enough knowledge to get into the university; but no coach can guarantee to teach wisdom to go with it Jesus grew in wisdom by working his way forward. It is of no use to wish to be wise without being willing to go through the trouble it takes.

Who liked Jesus?

One way of judging the worth of a man is to ask: Who likes him? Merely being popular is not enough Popular with what kind of people? Luke writes that the boy and young man Jesus advanced "in favor with God and man." (God and **men**, literally) Put into everyday language, this means both God and men liked him better every day In later years Jesus had bitter enemies, who at last murdered him; but in his younger years, if Luke tells the whole story at this point, Jesus appears to have had no enemies He made only friends Jesus was not one of these cranks who doesn't care what people think about them But he did not forget (what so many otherwise normal persons forget) that it is much more important that God should like you than that other people should We must leave it to the reader to think it out from here. If Jesus grew physically and mentally, spiritually and socially, how can Christians have all-round growth like that in our own lives?

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

TO CONSIDER FLY-FREE DATE—Wheat growers are urged to recognize October 10th as the Hessian Fly-free date for Lancaster County. Varieties other than Dual and Redcoat should not be planted before this date.

TO PLANT COVER CROPS—To have all ground covered with vegetable growth over the winter months is a good practice Some tomato, tobacco, potato, or corn fields may, as yet, not have any cover crop seeded. Corn field on which atrizine was used and especially if the field is going back into corn in 1962, it is very important that some crop be sowed this fall to be plowed down next spring. Any of the winter grains may be seeded until early November and give cover and protection.

TO PROTECT FARM MACHINERY—As machinery is used for the final time each season, it should be cleaned and greased before rust has a chance. Also, it is good management to get it under cover before bad weather arrives The Machinery Shed is a good investment on most farms With all barns being filled to capacity these years with feed supplis and in order to reduce the possible fire loss, the storage of machinery in a nearby shed especially for the purpose is recommended.

TO SAVE THOSE FINGERS!! AND THE HAND—We repeat the word of caution that tre mechanical corn picker may ruin your future, if you are not careful. Corn picking season is at hand and operators will be exposed to this machine If corn picker operators will only remember to stop the macrine while cleaning or making any repairs, and take time to be safe, many accidents will be prevented

TO PLAN FALL FORAGE INSECT CONTROL—All alfalfa, clover, and trefoil growers should plan to treat their fields this fall for spittle bug and alfalfa weevil control. Heptachlor is recommended for October and Dieldrin for October and November; either sprays or granules may be used. These recommendations for fall treatment are replacing any spring applications.

Ag-industrialist Sees Reason For Lack of Schooling

Editor
Lancaster Farming

Dear Sir·

I enjoy receiving Lancaster Farming The editorials and advertisements are especially valuable. (The ads keep me posted on what my competitors are doing)

The editorial in the September 16th issue touched an interesting point. I was reared on a farm and finished a BS MS, and PhD degree in agriculture and work in agindustry The work is very interesting and I would not change jobs with anyone I know. However, the reason more students are not following courses in agriculture is that men with BS degrees in engineering or chemistry get the same pay as those with PhD degrees in agriculture

Best wishes to you.

Sincerely yours,

D W Young, Biologist

IFYE Student Writes Thanks

Ed NOTE: The following is a copy of the first letter written by Glenn Porter to the sponsors of the International Farm Youth Exchange Program

The Nieuw Amsterdam
September 6, 1961

Dear Sponsors·

Last winter you were contacted about contributing to the I F Y E fund This is the first in a series of letters you will be receiving from me

I am on my way, after an extremely busy week in Washington and a hectic day in New York City I am going at a much more leisurely pace aboard the "Nieuw Amsterdam," with time to let you folks back home know how I am doing.

In Washington they kept us going from morning to night studying such subjects as understanding ourselves and others It was brought out that "any fool can see differences" but "a wise man understands them." I probably will be a fool much of the time. We also spent a lot of time down-town being briefed by the State Department on United States Foreign Policy, Soviet Policy,

Ketosis May Be Space Traveler Ill University Researcher Reveals

It is possible that future pace travelers may suffer om ketosis if forced to hibernate" on long journeys, said a professor of harmacology studying the isease this week.

Dr David Kronfeld, assistnt professor of pharmacology engaged in the use of radioisotopes in the study of metabolic diseases of cattle at the New Bolton Center of the University of Pennsylvania School of Veterinary Medicine near Kennet Square, said Wednesday, "It is important that we find out how cows and sheep manage to get along with such a little bit of glucose in their body cells."

Speaking during the Conference on Animal Diseases and Ground Breaking ceremonies for a new clinic and dormitory at the center, Dr. Kronfeld explained that Ketosis occurs in both man and animals when the body fails to make proper use of glucose It also occurs, he said, when animals are fasting or exercising severely, and also in connection with certain diseases such as pregnancy toxemia in cows and sheep and diabetes in humans

Dr Kronfeld said research on ketosis actually began before the turn of the century, but advances were slow until the advent of the radioactive materials By building radioactive carbon into glucose and other compounds, the progress of the compound can be traced through the body of the animal

Since the cow, sheep and other ruminants absorb very little glucose from their digestive tracts, but rather absorb large amounts of fatty substances which readily form ketone bodies, they (ruminants) make excellent laboratory animals for the study of ketosis, the professor said. If we can learn how ruminants have adapted their bodies to use such small amounts of glucose, we will have gone a long way toward conquering dia-

EXAMINING A "SNORTER" DWARF Angus at the Animal Disease Conference and Ground Breaking ceremonies for a new clinic and dormatory at the University of Pennsylvania's School of Veterinary Medicine Rehearch Center near Kennett Square are, L to R , Dr J Ellis Crowshaw, associate in anatomy, William Reid, Oxford R1, Dairyman, and Chester County Agent, Robert Powers The heifer in the picture is two years old. She shows the typical shortened face and distended belly associated with dwarf Research at the school is concerned with developing a test which will identify cows and bulls carrying the recessive genes which produce dwarf offspring. —L .F Photo

New Ful-O-Pep Pig Starter is

GUARANTEED PALATABLE

or your money back

The sooner little pigs eat and the more they eat the more they gain. With Ful-O-Pep Pig Starter, you can expect a pound of gain on only 1.4 to 1.6 lbs. of feed. That's why palatability is so important—pigs eat more and make greater gains at a time when those gains cost you less.

Try a bag of new Ful-O-Pep Pig Starter today and see if it isn't the most palatable Pig Starter you can buy. If your pigs don't prefer it, return the unused portion and we'll give you your money back.

. . . fastest growing beef feed

Big sales increases in recent years prove Eastern States BEEFMIX the No. 1 choice of northeastern beef raisers. And for good reasons: You get faster growth . . . heavier finishing weights . . . herd uniformity. BEEFMIX with 32% protein is the preferred growing and finishing supplement . . contains stilbestrol plus balanced proteins, vitamins and minerals.

BEEFMIX gives you:

- *15% to 20% increased growth*
- *Up to 10% better feed efficiency*

Ketosis & Space

(From page 5)

betes in humans he said.

Dwarf Beef

In other discussions at the conference, Dr Ellis J. Croshaw, associate in anatomy said experimentation with "snorter" dwarfs in beef cattle tends to indicate one of the major reasons for the high percentage of incidence in some herds is the 'breeding of cattle for the short, compact animals.

Dr Croshaw pointed to the record of 20 to 30 per cent incidence reported in some herds as a vast economic loss He said the condition appears to be growing steadily worse, but many cattlemen are reluctant to discuss it or give reliable information on their breeding herds He said the condition appears to be much more prevalent in the Angus and Hereford breeds than in the Shorthorn herds

Research at the School of Veterinary Medicine is concerned with finding a test which will identify cows and bulls with the recessive genes which produce dwarf offspring, but Dr. Croshaw would make no estimate as to when such a test might be forthcoming

Horse surgery and repair of bone fractures of race horses was discussed by Drs. Charles Raker

NEW HYBRIDS FROM P-A-G . . . .

Bred for modern performance...top yields!

Whether you feed, sell, or seal, you want modern, high-yielding hybrids! New hybrids from P-A-G are adapted to the needs of today's modern agriculture . assuring you of top yields and top corn profits Here's why:

- **Uniform sizing means trouble-free planting—even stands.**
- **Special fungicide coating protects against soil diseases.**
- **Better insect and disease resistance keeps corn healthy.**
- **Uniform ear placement and standability make picking easy.**
- **High yields and high shellout lead to high corn profits.**

Talk to your P-A-G dealer soon about NEW P-A-G hybrids . choose from P-A-G's complete line of modern hybrids.

Chicken Specials

By Mrs. Richard C. Spence

Now, when chicken is so often featured as a special at food stores, is the time to try some special chicken recipes Too often we rely on the old favorites and thus pass up some delicious eating because we are reluctant to try new flavor combinations or new methods of cooking.

Too often a recipe is passed by because the name sounds too exotic. It is a good idea to look over the list of ingredients before deciding whether you might like to try it or not You do not know what you might be missing!

BAKED CHICKEN WITH BUTTERMILK BISCUITS

½ cup flour
1 teaspoon salt
¼ teaspoon pepper
¼ cup grated parmesan cheese
2 (2½-lb) fryer chickens, quartered
½ cup butter or margarine
1 (10-oz) can cream of celery soup
1 (7-oz) bottle lemon-lime carbonated beverage
½ cup grated permesan cheese
1 package refrigerator buttermilk biscuits.

Combine flour, salt, pepper and parmesan cheese in a paper bag. Add chicken pieces, a few at a time, and shake bag to coat chicken thoroughly. Melt butter in bottom of baking pan (9x13-x2"). Arrange chicken, skin side down, in pan. Bake at 425 degrees for 30 minutes, then turn chicken and bake for 15 to 20 minutes longer. Combine soup with lemon-lime carbonated beverage & ½ cup parmesan cheese. Pour over chicken. Arrange refrigerator biscuits around chicken. Bake at 450 degrees for 12 to 15 minutes longer or until biscuits are browned. Makes 4 servings.

* * *

GOLDEN CRUNCHY OVEN FRIED CHICKEN

2½ to 3 pound frying chicken, cut up
1 stick (½ cup) butter or margarine
½ cup evaporated milk or light cream
1 cup crushed corn flakes
¼ cup finely chopped onion
¼ cup finely chopped parsley
1 teaspoon salt
½ teaspoon black pepper
1 teaspoon dry mustard
½ teaspoon marjoram

Melt butter in a shallow 13 by 9 inch baking dish in a hot oven (400 degrees). Dip chicken pieces in milk and roll in corn flake crumbs. Arrange chicken in the baking dish skin side down. Cover the top or the chicken with the remaining ingredients. Bake in a hot oven (400 degreeh) for about twenty minutes. Turn cricken. Bake another 20 to 30 minutes or until chicken is tender.. Serve immediately or, serve cold at a picnic or patio party.

¼ cup melted shortening
4 ounces grated cheddar cheese
½ cup soft bread crumbs
¼ teaspoon poultry seasoning
¼ teaspoon paprika
½ cup milk

Place halves of chicken skin-down in shallow baking pan; brush with fat. Set pan on broiler rack so that chicken is about 4 inches from heat. Broil for about 20 minutes, or until chicken is well-browned. Turn; Brush with fat and continue broiling until tender about 20 minutes longer. Combine remaining ingredients and heat over hot water just enough to melt cheese to spreading consistency. Spoon cheese mixture over skin-side of chicken and continue broiling until lightly browned. Serves two.

* * *

LEMON BARBECUED CHICKEN

2 2-pound broiler-fryer chicken
1 small clove garlic
½ teaspoon salt
¼ cup salad oil
½ cup lemon juice
2 tablespoons chopped onions
½ teaspoon pepper
½ teaspoon thyme.

Have chickens split in half lengthwise. Mash garlic with salt; stir in remaining ingredients. Brush chickens with the sauce; place skin side down in broiler pan. Place under broiler so that surface of chicken is 5 to 8 inches from heat Broil until brown, 20 to 25 minutes, basting occasionally with leman sauce. Turn; brush with sauce and continue broiling and basting for 15 to 20 minutes or until done. Makes 4 servings.

* * *

GINGER-BROILED CHICKEN

2½ lb. chicken split for broiling
1 teaspoon onion salt
½ stick (¼ cup) butter, melted
¾ cup apple juice
1 teaspoon cinnamon
Ground ginger

Season chicken with onion salt. Place on oven-broiler pan cut side up, or on outdoor grill cut side down.

Brush with part of melted butter. Place 6 to 7 inches from heat source. Combine apple juice and cinnamon with remaining butter During cooking time, turn chicken and baste with sauce every 10 minutes. After 20 minutes sprinkle chicken very lightly with ginger. Broil 40 minutes or until tender.

Note: To prepare 3 chickens for broiling, the sauce recipe may be doubled.

* * *

CHICKEN BREASTS FRENCH-STYLE

4 whole chicken breasts, split and boned
½ stick (¼ cup) butter
Salt
1 chicken bouillon cubes
3 cups water
¼ cup elbow macaroni
½ cup sliced ripe olives
½ cup sliced celery
½ green pepper, sliced

—Cert. Kenbar
—Cert. Hudson

Seed Wheat
—Cert. Red Coat
—Cert. Seneca
—Cert. Dual

ALL "Certified" SEED IS NOT ALIKE

DON'T LET ANYBODY tell you all Certified seed is the same. There IS a difference! A. H. Hoffman Seeds, Inc. is not only the largest producer of "Certified" winter grains in Pennsylvania, but the superior quality of Hoffman "Certified" seeds exceed the state certification standards by a wide margin.

FOR EXAMPLE:

Penna. Certification Requirements for Wheat		A. H. Hoffman's Certified PENNOLL WHEAT (3 year average)
99.00% (minimum) —	PURITY	— 99.75%
1.00% (maximum) —	INERT MATTER	— 0.25%
90.00% (minimum) —	GERMINATION	— 94.7%
58 lbs. (minimum) —	WT. PER BU.	—61.5 lbs.

The certification tag is not enough. Hoffman tags on the seed you sow can mean bigger crop profits for you. That fact has been demonstrated over 60 years.

Get complete information and prices on Hoffman Wong BARLEY; Norline and DuBois Winter OATS, Red Coat, Pennoll, Dual, and Seneca WHEAT, Balboa and Tetra-Petkus RYE.

Contact your Hoffman Seedman or phone TW 8-3421 for delivery to your farm.

CAN YOU FILL IN THE MISSING WORD?

The answer should be easy because some things just naturally go together.

Take electricity for example. It just naturally goes with comfort, convenience and a low-cost way of getting things done. That's why electricity and better living go hand-in-hand . . . to make it the biggest bargain in your family budget today.

Chicken Specials

(From page 9)

4 teaspoons cornstarch
1 teaspoon sugar
1 tablespoon wine vinegar or lemon juice
1 tablespoon cold water
2 drops yellow food coloring
2 tomatoes, peeled and quartered

Lightly brown chicken breasts in melted butter. Sprinkle with salt Cover and cook ober low heat for twenty-five minutes. Dissolve bouillon in 3 cups hot water Add macaroni and simmer 5 minutes Add olives, celery and green pepper Simmer an additional five minutes Combine cornstarch and sugar Gradually stir in vinegar, water, and food coloring Blend cornstarch mixture into the bouillon Stir and cook about 5 minutes Place tomatoes in skillet with chicken and pour sauce over all. Cover and simmer about 10 minutes. The celery and green pepper should be slightly crisp

* * *

INDIA BAKED CHICKEN

3 to 3½ pound chicken, whole
½ cup uncooked rice (1½ cups cooked)
10½ oz can condensed mushroom soup
½ teaspoon corry powder
6 ripe olives, chopped
2 tablespoons chopped onions.
2 tablespoons butter, melted

Cook rice according to directions on package. Rinse cooked rice thoroughly in cold water Drain. Combine rice, ½ cup condensed mushroom soup, ¼ teaspoon curry powder, olives, and onion Stuff bird. Close body cavity and neck with skewers and turn wing tips to back. Brush with butter and cover lightly with a tent of foil Roast in a slow oven (325 degrees) for 2½ to 3 hours Serve sliced chicken and stuffing with sauce made by combining remaining condensed soup with ¼ teaspoon curry powder and heating

* * *

CHICKEN AVOCADO IN ORANGE SAUCE

⅓ cup enriched flour
1½ teaspoons salt
¼ teaspoon black pepper
½ to 1 teaspoon curry powder
1 teaspoon chili powder
2 1-pound packages frozen chicken parts, thawed
¼ cup butter or margarine melted
2 cups reconstituted frozen orange juice
1 tablespoon grated orange rind
1 cup pecan halves
8 oz medium noodles
1 medium orange, peeled and sectioned
1 ripe medium avocado, peeled and sliced

Combine flour, salt, pepper, curry powder, and chili powder. Coat chicken lightly with flour mixture, reserving excess flour Fry chicken in butter or margarine until golden brown; cover, and cook until tender, about 20 to 25 minutes Remove chicken from skillet. Blend the flour mixture into juices in skillet, then stir in orange juice Heat until slightly thickened. Add chicken, orange rind, pecan haves and orange sections. Heat to serving temperature Meanwhile, cook noodles in boiling salted water until tender about 7 minutes Drain and arrange on heated platter Pour most of sauce over noodles. Arrange avocado slices on top of chicken, and spoon a little orange sauce over them.

Serve immediately Makes 4 to 6 servings.

Note: If sauce is prepared ahead of time, add orange section to mixture just before serving.

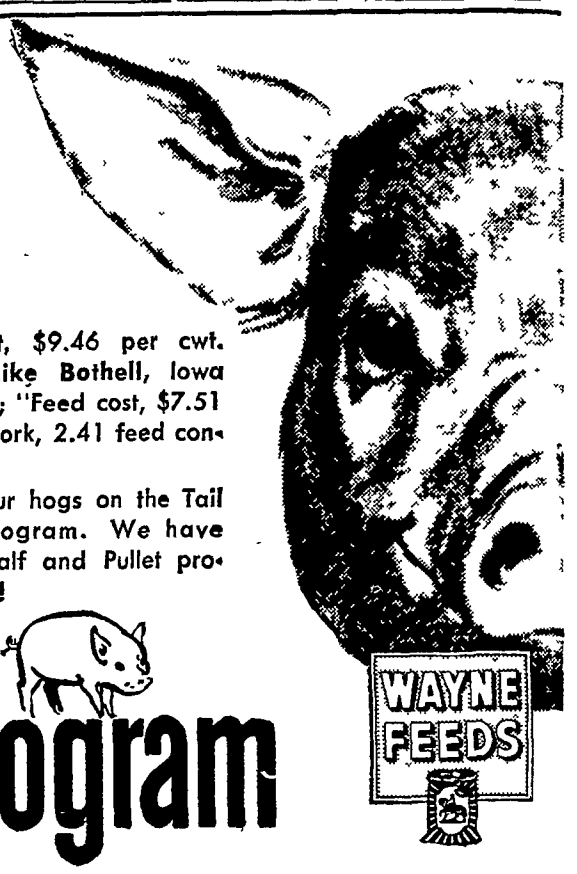
MORE FOR YOUR MONEY!



Here's why. The Wayne Tail Curler feeding program gets pigs off to a fast, healthy start—provides the proper nutrition at every stage of the life cycle. Real feed efficiency gives you low cost pork production. Read what other Wayne feeders say: **J. L. Manoe**, Xenia, O.: "218 lb. pigs in 5 months, 4 days. Feed cost, $9.46 per cwt. gain." **Mike Bothell**, Iowa City, Iowa; "Feed cost, $7.51 per cwt. pork, 2.41 feed conversion."

Get your hogs on the Tail Curler program. We have Wayne Calf and Pullet programs too!

Crop Summary

Moisture Controlling Farm Work

Dry weather and fair skies were a source of great satisfaction to the tobacco farmer this week as most of the '61 crop went into the sheds. But, the dry weather and dry ground became a source of frustration to the grain farmers who would like to get their barley and early wheat crops into the ground.

Only a small percentage of the tobacco crop remained in the fields late this week. Early-harvested tobacco was curing well with very little pole burn reported.

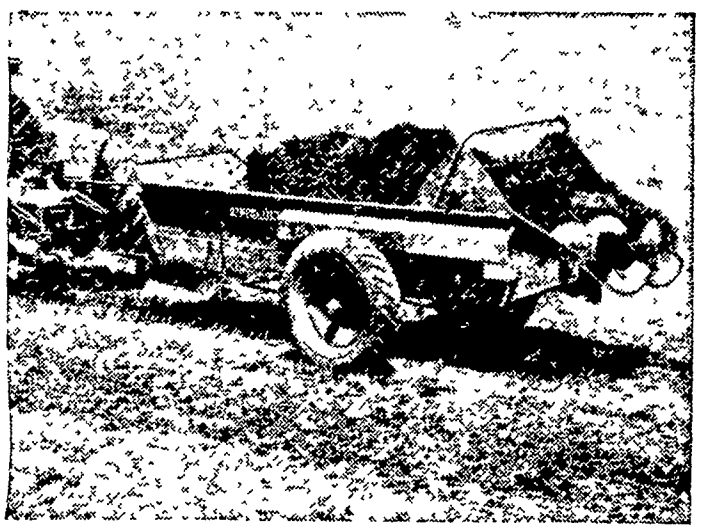
Many farmers delayed the seeding of barley. From around the county came reports of farmers waiting for rain to soften the soil enough to make plowing practical. Many farmers were becoming concerned about new alfalfa seedings and the early-planted barley. One farmer reported his barley sprouted and up but wilting for lack of moisture.

Corn picking began on a limited scale in the county this week with reports of good yields and excellent quality. The crop matured well and the husks appear to be loose for easy picking. The crop is cleaning well in the husking rolls. Ensilage corn, in all but a few late fields, was beginning to dry

(Turn to page 12)

COMPARE THIS

95-bushel spreader



Look at the No. 95-G differences . . . here's quality to out-wear ordinary spreaders.

- Steel pintle drive chain . . . REGULAR EQUIPMENT
- Treated lumber — resists warp and rot
- Bridge-designed frame — keeps box tight, resists loosening
- Special acid-resisting steel where needed for extra life
- A wide-spread that *REALLY SPREADS.*

Have you tried this "Booster Feed"?

RED ROSE® RUMENATOR

This ration is an excellent booster feed or appetizer for dairy and beef animals of all ages. Fortified with vitamin A, vitamin D2, vitamin E, animal fat and minerals, Red Rose Rumenator supplies high levels of available energy to keep herds in top condition.

When fed to dairy cows or beef animals Red Rose Rumenator supplies "energy and vitamin lift" . . . dairy cows stay at peak production longer . . gets cows in better condition for calving . . haircoats are glossier . . . and young stock grow faster and are more vigorous.

RED ROSE RUMENATOR has had an excellent acceptance by all dairymen who have tried it. Why don't you try it, too? Feed 5 pounds of Rumenator per day on top of regular feed to dairy cows. For beef cattle -- start steers on 1 to 5 pounds per head per day for 5 to 7 days to improve and aid in bringing steers to full feed.

Letters

(From page 4)

and how it relates to our host country. We also heard from an expert on our country. We heard the how and why of our Agricultural program from the experts of the United States Department of Agriculture We had an interesting time at the Royal Nepalese Embassy, discussing Nepal with the staff there. With all this we almost felt that the task ahead was impossible It will be difficult, I know, but I believe that with the background the International Farm Youth Exchange IFYE staff have given us, we will do OK

I am now sailing for England, where I will land September 8, and leave on the 15th for Bombay, India, with stops at Port Said and Aden From Bombay I will fly to New Delhi and then to Katmandu, Nepal.

I wish to say "THANKS" to you for helping to make this experience possible through your contribution to the IFYE Fund I will do my best to observe, learn, understand, and bring my experiences back to you and share them with you next Spring.

By the time you receive this letter I will be aboard the S S. Canton, enroute to Bombay. The next letter you receive from me will be from Nepal Thanks again.

Sincerely yours,
Glenn Porter

S. O. Trupe, R. D. 1, East Earl, Pa.

D. E. Horn & Co., Inc. of Red Lion, Red Lion, Pa.

Two typical calves weighing 100 pounds at 4 days of age gained 85 pounds by the end of six weeks for an average gain of 2 pounds per day. They were graded by a local meat packer as choice veal at 35c a pound for a net profit on each calf of $25.43. Their diet consisted only of Peebles' Groom Milk Replacer.

Best Food Buys

Fall Harvests Near Completion

Supplies from nearby growing areas continue to hold retail produce prices down while providing food-shoppers with a big variety of popular items This situation can be changed over night and at any time, reports Tom Piper, Penn State Extension Marketing Agent Next week marks the beginning of October so we can expect a killing frost to reduce local produce supplies over night.

Plentiful vegetables considered good buys this week include potatoes, beans, cabbage, celery, peppers, eggplant, endive, escarole, radishes, squash, pumpkins, sweet potatoes and carrots Tomatoes and sweet corn are available but quality should be determined Lettuce, cucumbers, cauliflower, parsley and turnips are rather high in price because of supply conditions.

Small and medium size eggs continue as an economical source of protein Cheese is another good food buy since total production is running 12 per cent above last year.

Local Feed Firm Adds Salesman

Miller and Bushong, Inc Rohrerstown have announced the addition of John L Renshaw to the firm's sales and service staff

Renshaw, who resides at 2273 Lititz Pike, Lancaster, is a graduate of the Univer-

JOHN L RENSHAW

sity of Connecticut where he majored in Poultry Husbandry He has been an individual poultry grower and has spent the past five years with a national feed manufacturer

Renshaw is a veteran of World War II and the Korean Conflict and was separatd from Naval Aviation Service with the rank of Lieutenant Commander.

He is married and the father of two children He began his new duties September 18

● Crop Summary

(From page 11)

up as silo filling came to near completion.

Digging of fall potatoes was in full swing last week throughout Pennsylvania, according to the weekly crop and weather summary issued this week by the State Crop Reporting Service.

Kepstone State farmers took advantage of continuing good weather to bring field work up to date Some delay in fall plowing and seeding was reported from the southern and central areas by lack of soil moisture.

Apples are ripening, sizing well and free of insect and disease damage. McIntosh, Cortlands and Jonathans were being picked last week Some Red and Golden delicious will be ready for picking this week. Only a few late varities of peaches remain to be harvested The grape crop is progressing very well and Concords are about three to four weeks from maturity.

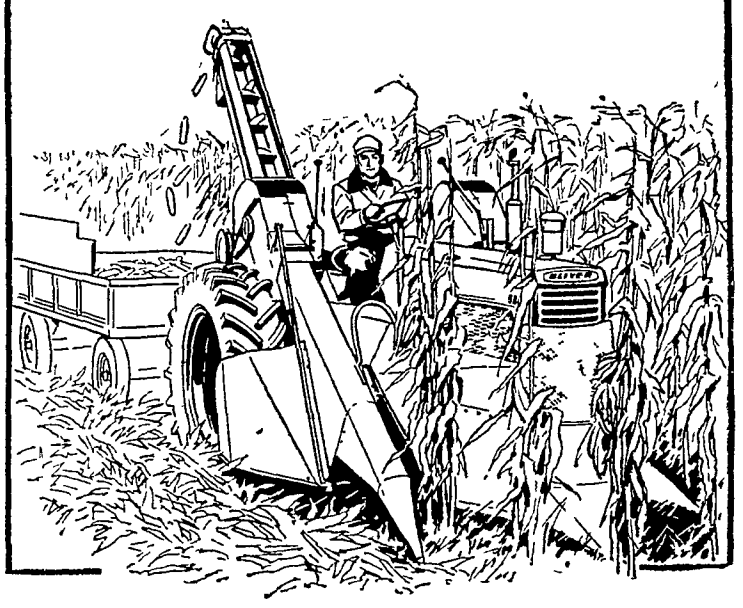
With most of the tomato crop harvested, processing plants will probably close this week. Cabbage is still being cut and the crop is of good yield, size and quality. Snap beans and sweet corn harvest is about finished.

A large portion of the corn crop has reached maturity in the southeast. Little damage has been reported to the crop by the dry weather in southern and central areas

---

Mishandling of live animals results in dark colored beef

OLIVER
MOUNTED PICKERS
for today's 100-150 bushel yields



Here's your best choice of two-row mounted corn pickers. Long, eager snapping rolls with spacing you can adjust from the tractor seat. Roller-type gathering chains cut upkeep costs...are twice as strong, last three times as long as pressed steel or pintle types.

Side and wagon elevators are bigger...handle your big ears and bumper crop yields. Long, live snapping roll points lift the down and leaning stalks ...bring in more corn every year...in every field condition.

You get more safety in an Oliver Model 4, too. Safety clearing of the snapping rolls ...safety clutches on all main assemblies...safety roominess on the platform. If you own an Oliver row-crop tractor, be sure you see the Oliver mounted before you buy a picker.

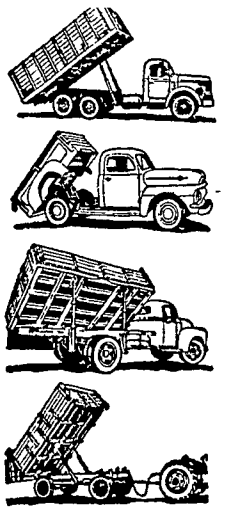
LEOLA — QUARRYVILLE

HARSH HYDRAULIC HOISTS



The 32 available models come to you with a wide range of lifting capacities ranging from 3½ to 20 tons for your truck, pickup, or trailer. The smooth, trouble free action of a HARSH HOIST has a fast lifting time of from 12 to 160 seconds, which allows more time for actual hauling.

These hoists come to you at an average cost of only 16¢ a day as compared to the $10-$15 a day you now spend to manually unload your truck.

To design and build a light-weight, low-costing truck hoist suitable for all types of farm use, priced within the average farmer's budget was the aim of "Bud" Harsh when HYDRAULICS UNLIMITED MFG. CO. began operations. This hoist was built and is now in use throughout the nation.

The HARSH HYDRAULIC HOIST averages only $328 52 (including Federal excise tax) and maintains a low taxable weight which averages 273 lbs. These economical hoists are built for either back or side dumping, depending upon your need.

Save costly time and eliminate back-breaking labor by unloading with a HARSH HYDRAULIC HOIST engineered for economical, speedy, and durable farm use.

Houser Shows 2 Champs In Lampeter Swine Show

James Houser, Lampeter, carried home two grand champion rosettes and one reserve champion ribbon from the swine show at the Lampeter Fair, Wednesday.

Houser showed his Chester white sow to the Grand championship spot in the breeding hog show and went on to exhibit his mediumweight pen of four Chester White market hogs to the top spot in that division. The hogs averaged 200 lbs.

In the Pen of two market hogs, Glenn Book of Lancaster R7 took the top placing with two 225 pound Yorkshires. Houser had the reserve pen of two Chester White heavyweights

Houser is a 15 year old junior in vocational agriculture at Lampeter Strasburg High School

Champion boar of the show was exhibited by W. F. Ruoss, Ephrata with a young Duroc. Placing second to Houser in the sow championships was the Hampshire aged sow of Roy Slaymaker, Strasburg R1.

Judge Tony Dobroski, Associate York County Agent made the following placings in the show:

Successful Dairyman Says:

"Farm Bureau's DARI-PAK Program Right For Me"

Ray W. Beyer, Lititz, R. D. 1, is feeding his entire herd of "26" Holsteins, Farm Bureau's 14% DARI-PAK.

He especially likes:

1. GRAIN EXCHANGE PROGRAM - - retail price for my grain!
2. MILKMAKING POWER of Dari-Pak - - more for my money!
3. PALATABILITY - - my cows really go for Dari-Pak!
4. CONVENIENCE & ECONOMY - - I save time and labor!

Get the exciting details of Farm Bureau's new popular DARI-PAK — — you'll like the many advantages of our feeding program. Two modern feed manufacturing plants (New Holland & Quarryville) assure prompt delivery of quality "mill fresh" feed. Two protein levels, 14% and 16%, now available in this tasty coarse textured ration.

Qualified FIELDMEN are anxious to serve and assist you in designing a PROFITABLE DAIRY FEEDING PROGRAM.
